June 2017 – Referral Labs Edition

Prices Held for 2017-18

We are very pleased to announce that due to a mixture of increased efficiencies in our laboratories and test growth we are in a position to maintain our pricelist at the 2016/17 level for a further year.

A number of Trusts and groups of hospitals have come to us in the last year interested in our specialist test services. We offer a mix of services which can make real differences to modern patient care. We are also able to look at electronic return of results either using email and secure PDF or direct lab to lab computer links.

New Developments

The Toxicology Laboratory is working on new methods to further help with the increasing problems of managing new psychoactive substances in the United Kingdom. We are only too aware of the clinical significance here in Birmingham where we have had several recent deaths due to psychoactive substance misuse.

UKAS Accreditation

All our laboratories were inspected by UKAS in the early spring. We are addressing the list of non-compliances and are very hopeful that we will gain full UKAS accreditation in the next few months.

Working with Us

We are always interested to hear from our user's especially on aspects of our service that either you appreciate or where you feel we could do better. With this in mind we have an Innovation and Service User Feedback postcard and if you have any suggestions would really appreciate you completing one and returning it back to us. This can also be downloaded from our www.cityassays.org.uk website.

IBMS Congress 2017

As normal our laboratory will be represented at the IBMS Congress at the ICC Birmingham on 25-27th September. If you are attending we would really value you dropping by our City Assays stand (R15) and saying hello.

SWBH Pathology TV News

We have had fantastic feedback from you on the YouTube videos that we have produced over the last few years. In particular the videos looking at the legal high issues informed both laboratories and a much wider audience. We have also seen many views of our UKAS Quality series which featured David Burnett and Ian Barnes. In the next few months we will be producing a number of short videos which will both inform about our services and also be useful to those studying for exams or the specialist IBMS portfolio.
